

## Debut HB Special

### Huet Brothers start unique project for unforgettable experiences across Europe.

The **HB Special** is a handbuild car and will be produced in a limited version of **12 cars**. It is a Barchetta-styled car, that evokes memories of the Mille Miglia, Targa Florio and Le Mans racers from the mid '50s. Build by hand by Paul and Tino Huet, the body shell is made from **Carbon Fibre** over an **aluminium frame** on the chassis of a Triumph TR6. The engine has been upgraded to produce **180 HP** and with a weight of **750 kg** it promises to be fun to drive.

The **HB Special** is **not for sale**, but can be driven during one of the HB Experiences. The **HB Experience** is about **adventure, breathtaking sceneries, culture, romance, luxury and good manners**. But most of all it's about enjoying life. The Huet Brothers call this **the original spirit**. Whilst driving this car exclusive places and hidden gems will be visited in **12 different countries**. Fancy a drive through the Norwegian fjords or prefer a Scottish Highland tour?

At the Amsterdam AutoRai 2007 the HB Special was revealed by **Gijs van Lennep**. He will shake down the car to determine the correct brake balance, camber and castor, drivability of the car and help to authenticate the car.

Support this Project by buying the **HB Benefactor Chronograph**. A Swiss Made watch in style of the dashboard instruments and the holes in the steering wheel.
